

SITE ANALYSIS

Latitude	23
Longitude	77

RENEWABLE POTENTIAL

Solar Irradiance	5.22 kWh/m ² /day
Solar Rating	Good
Wind Speed	5.19 m/s
Wind Rating	Good
Recommended Deployment	Hybrid
Confidence	80%

Good solar irradiance and good wind resource support a combined deployment.

Used for energy & cost analysis below: Hybrid

TECHNICAL ASSESSMENT

Suitability Score	70.75 / 100
Suitability Category	Highly Suitable
Technical Feasibility	70.75%
Feasibility Status	Feasible

ENERGY

Annual Energy Yield	18,119,471.93 kWh/year
Yield Rating	Excellent

This site's estimated output is among the strongest observed — typical of prime desert or coastal wind corridors.

FINANCIAL

Project Cost	₹183,750,000
Annual Revenue	₹63,418,151.75
ROI	762.83%
Payback Period	2.9 years
